Key Modules

Attendance

This module helps to track staff and student attendances accordingly and generates necessary reports staff wise as well as student wise.

Inventory

This module helps to manage school inventory more efficiently and make sure the goods or items are properly utilized. This module includes inventory types, categories, item details, inventory reports etc.

Academic

This Module helps to create different types of examinations or terms to the classes and subjects. It also allows entering the marks and generating certificates / reports to the passed and failed students. It also provides reports on percentage of total students passed or failed etc.

Results

This module helps to create marks type, subject wise minimum and maximum marks distribution, grades, promotion and demotion, issuance of grade /report cards etc.

Library

This Module gives a centralized management system for school library; it helps in managing books details, returns, issues, books availability, books issued to students and staffs, stocks, fines and reports etc.

Administration

This module helps to manage all administrators. One can provide permission to all administrators so that the process and data is secure all times to make sure that no one can misuse the application.

Analysis

This module helps to depict the pictorial representation of various data like progress of admission over the years, performance of students above a certain percentage, progress curve of a particular student over the years.

Fee Management

This module helps in tracking student fee payments, fines, installments and provides reports on students regarding paid fees, unpaid fees, fines etc. Interfaces to name a few include creating yearly/monthly fee heads, fine etc.

Student Details

This Module records the student details according to class, section, session, student identity, academic year, gender etc. Also one can promote the student to higher classes after final examinations and record student transfers as well. Interfaces include student details, individual student wise yearly /monthly fee payment status etc.

Staff

This module helps to create and view the posts, designations, staff profile details etc.

Reports

This module helps to generate several reports which can be downloaded in excel or word document. For example, report of fee generated during a year, report of student enrolled during a year, report of staffs recruited during a year, inventory report, report of students with in a specified percentage, report of books, attendance report and holiday list etc.
