

# Payment system for Spendesk

Looking to reduce reliance on external providers to execute payments, Spendesk wanted to integrate a payment system into its web app.

HELENA HILL 

Established in 2017,  
SEPA payments  
enable easy cross-  
border payments  
in euros across  
36 countries.

Spendesk engaged Netguru to build its internal banking system for handling SEPA incoming and outgoing payments from concept to completion.

Netguru provided Spendesk with a self-sufficient team of experts who worked in parallel with its teams.

Thanks to the collaboration, Spendesk successfully completed the BPCE PS certification, which brought the business closer to becoming independent from external providers.
