

77% page speed boost for meal delivery web app

Powermeals is
a meal-delivery
startup.

They had a working WordPress web application in need of bug fixing, optimization, and new features.

Which plan best suits your lifestyle?

You can update or pause orders up to 6 days before delivery

- I want a range of different meals, let me choose from the whole menu
- I want healthy meals in regular portions
- I have a large appetite or an active lifestyle

Mix & match.

If you're looking for a combination of lunches and larger portions you can choose from our full selection.

Why choose us?

Feel great.

We cook nutritionally balanced dishes with real ingredients and healthy cooking methods.

Enjoy real flavour.

Our recipes are designed by chefs with inspiration from around the world. They will really get your taste buds going.

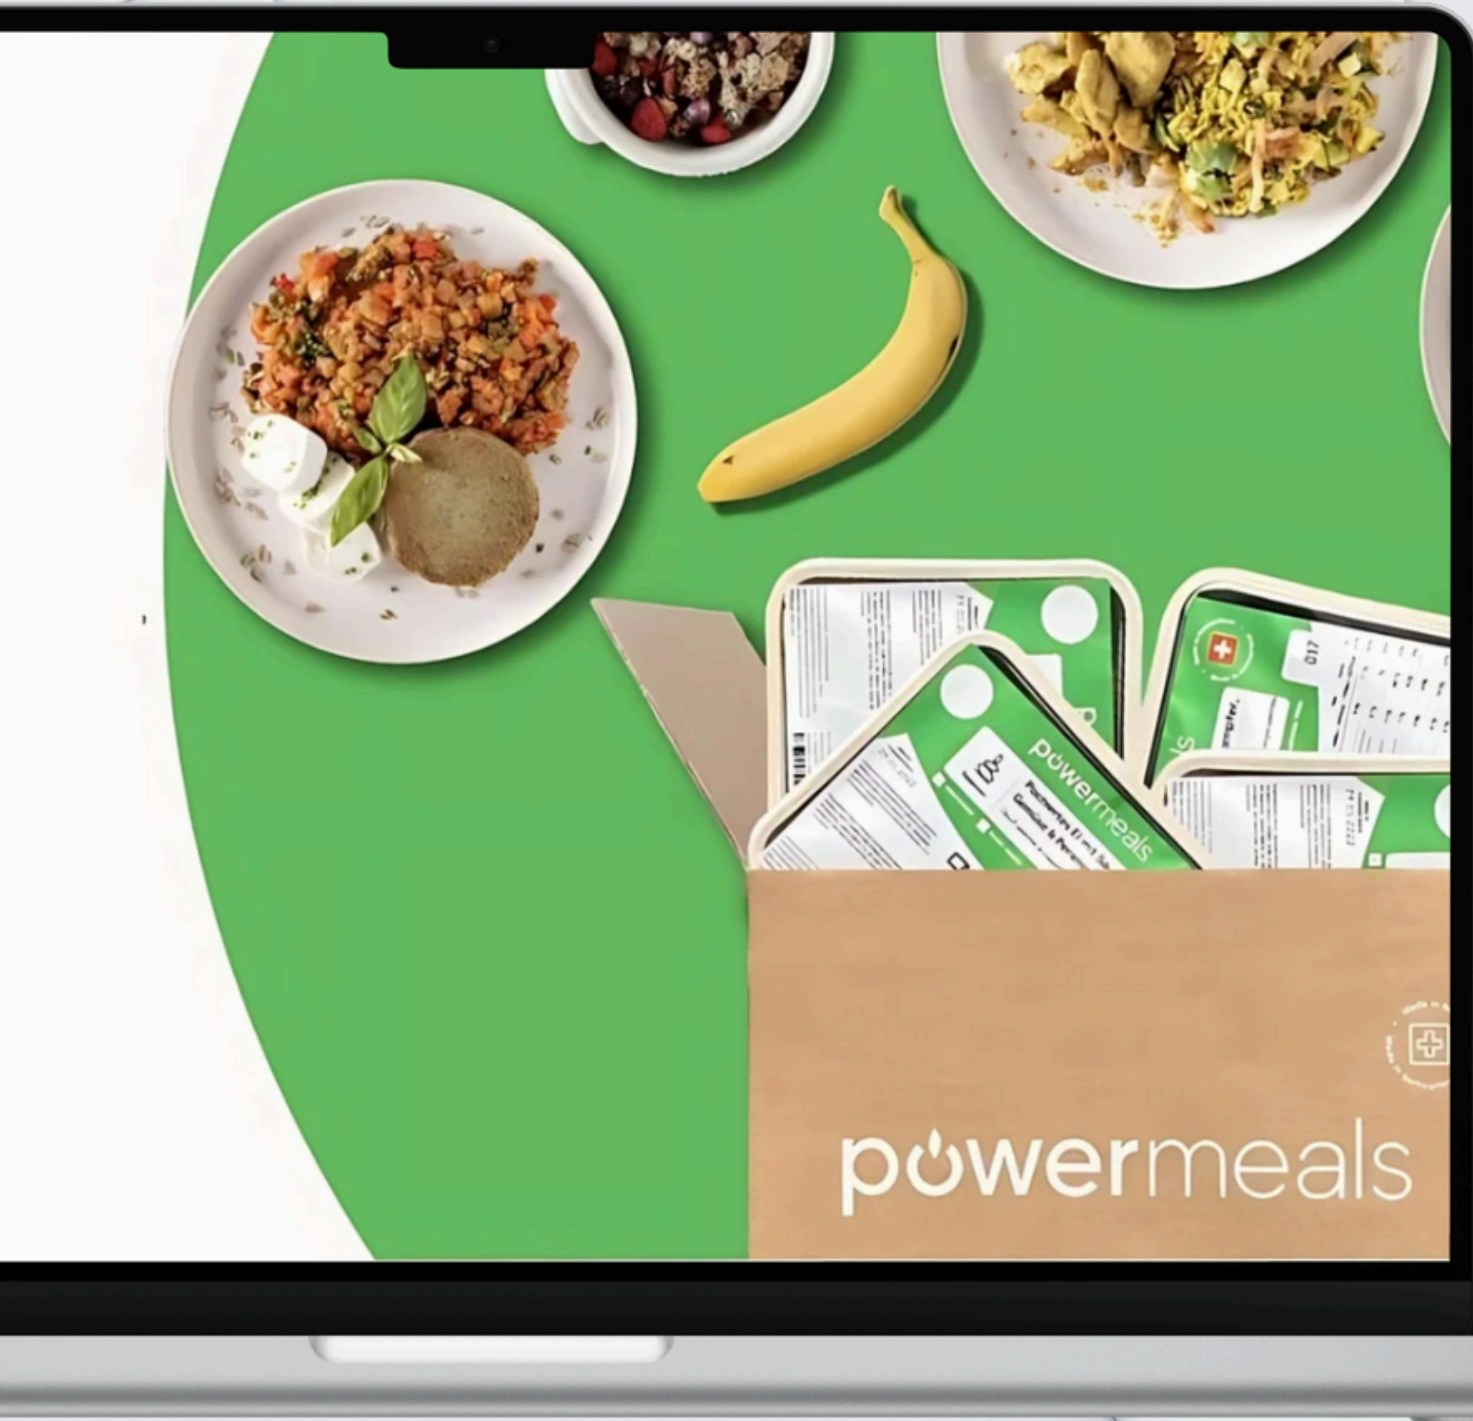

As a crucial part of their business, the **web app** was the main place where customers explored the offering and managed their orders.

So they asked us for
help in redesign
and optimization.

This is how it went...

We quickly:

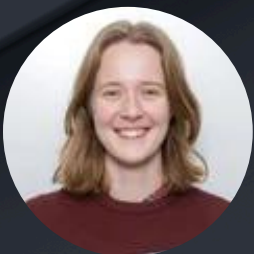

- ✓ Audited the user experience
- ✓ Implemented new designs based on findings
- ✓ Introduced new functionalities
- ✓ Improved filtering options
- ✓ Refined troubleshooting

Results?

- ✔ Full report from the UX audit
- ✔ Reduction in bugs to less than 2 per week
- ✔ Minimization of manual interventions
- ✔ Improvement in performance scores
- ✔ Faster page speed, from 9 to 2 seconds

"Netguru team were a joy to work with. Every team member is a real expert in their field – from designers to developers to project managers."

Isabel Acland
