# AI-powered financial app MVP in 5 weeks

Prospero.AI, a transformative fintech startup from NY, wondered how to get a mobile MVP super fast.

We had an easy answer.

With a team that:

- ✓ maintains high standards of code and speed

- ✓ identifies and addresses critical issues to improve usability

- ✓ proactively tackles performance, security, and accessibility issues which were initially overlooked

We jumped in with expertise in iOS and Android development.

The client's web app needed a revamped UI and additional knowledge-sharing features in just 5 weeks to align with a crucial conference deadline.
