

Speeding up development for Keller Williams

Keller Williams
needed to
accelerate
development
across tech stacks
and products.

"The entire industry was dependent on third-party technology companies. We quickly realized that we need to build proprietary software in order to give our agents the best chance to win."

Adi Pavlovic

Director of Innovation at KW

CASE STUDY

Netguru provided
a 50+ team of
mobile, frontend,
and backend
engineers.

The client gained
instant access to
React Native,
GraphQL, Go,
React, and
Node.js experts.

Netguru supported KW in **multiple projects:**

- ✔ Kelle app – an AI-powered personal assistant that helps KW associates
- ✔ Keller Covered – a free service for homeowners and homebuyers that helps them to shop for insurance
- ✔ Keller Mortgage – a tool for fast mortgage assesment
- ✔ Command – an all-in-one tool for real estate agents

Results?

CASE STUDY

Netguru helped
Keller Williams
reposition itself
as a technology
company.
Faster.

"Netguru has been the best agency we've worked with so far."
